

## EMPLOYMENT OPPORTUNITY

**Closing Date:** 2026/06/09

### Project Officer Winnipeg, MB

**Manitoba Hydro is consistently recognized as one of Manitoba's Top Employers!** We are a leader among energy companies in North America, recognized for providing highly reliable service and exceptional customer satisfaction. Join our team of Manitoba's best as we continue to build a company that champions safety, supports innovation, and delivers on our commitment to customer service - while actively fostering a diverse, equitable, and inclusive workplace reflective of the communities we serve.

#### Great Benefits

- Competitive salary and comprehensive benefits package.
- Defined-benefit pension plan for long-term financial security.
- Nine-day work cycle, typically resulting in every other Monday off to support a balanced approach to work, family life and community.

#### Position Overview:

We are seeking an experienced Project Manager to deliver operational technology and facility related projects under the guidance of a Team Lead. In this role, you will be responsible for managing all phases of the project lifecycle, from initiation and planning through execution, monitoring, and closeout, for complex technical projects that support mission critical systems and infrastructure.

You will work closely with cross functional teams, vendors, and stakeholders to ensure projects are delivered on time, within scope, and within budget, while maintaining high standards of quality and reliability. This position requires strong organizational skills, the ability to manage competing priorities, and the capability to drive outcomes in a fast paced, technically complex environment.

#### Responsibilities:

- Manage the full lifecycle of operational technology projects, including planning, execution, monitoring, and delivery.
- Develop and maintain project plans covering scope, schedule, budget, risk, quality, and communications.
- Coordinate and lead cross-functional teams, including internal stakeholders, vendors, and consultants.
- Monitor project performance, identify risks or deviations, and implement corrective actions as needed.
- Prepare and present regular project status updates, including financial performance and forecasting.
- Support procurement activities, including preparation of technical specifications, evaluation of proposals, and vendor selection.
- Oversee vendor and contract management to ensure deliverables are met according to agreed terms.
- Ensure system enhancements and solutions align with operational and business needs.
- Facilitate stakeholder engagement, including senior-level communication and alignment.
- Lead change management efforts related to new systems, processes, or technologies.
- Contribute to continuous improvement of project management practices.
- Resolve complex technical and operational challenges by coordinating appropriate solutions.

#### Qualifications:

- Bachelor's degree in a relevant field (e.g., business, technology, engineering) and minimum of five years' related experience;  
OR
- Diploma and a minimum of seven years' related experience;  
OR
- Trade Apprenticeship and an additional related certificate with a minimum of seven years' related experience.  
OR
- Combination of relevant education and experience will be considered.
- PMP or Program Management Professional (PgMP) certification would be an asset
- In depth knowledge of, and demonstrated ability to use, project management tools including Microsoft Office suite (Project, Excel, Word, PowerPoint), SharePoint, Copperleaf C55 and SAP PS module.

- Demonstrated ability to organize, schedule and coordinate work and to provide training, leadership, and guidance to other staff.
- Demonstrated ability at chairing meetings, achieving consensus, and obtaining commitment from various participants.
- Demonstrated understanding of, and ability to mediate, the working relationships between interdisciplinary project participants, project stakeholders within and outside the Corporation.
- Thorough understanding of the components of Operational Technology systems as they relate to infrastructure, software, security, and systems administration.
- Thorough understanding of general power system operations, terminologies, and specifics of systems responsible for the control and monitoring of Manitoba Hydro's bulk electrical system.
- Demonstrated ability to develop clear system requirements, methods, practice, and standards for computer-based systems.
- Demonstrated ability to interpret technical material quickly and concisely from a wide variety of vendors and technologies.
- Demonstrated high degree of initiative and mature judgment with the ability to make and implement sound decisions.
- Willing to travel both in and out of province.
- Possess a valid Province of Manitoba Driver's Licence.
- Must have completed Standards of Conduct training, or be willing to complete within two weeks of start date.
- Must obtain and maintain a current Personnel Risk Assessment and a "Clear" security rating in accordance with Manitoba Hydro policy P513.
- Critical Infrastructure Protection (CIP) Training is required and must be completed prior to transfer date and renewed annually.

### **Salary Range**

Starting salary will be commensurate with qualifications and experience. The range for the classification is \$43.35-\$59.82 Hourly, \$83,070.78-\$114,625.68 Annually.
