

Senior Project Manager, Digital & iLottery

We're looking for an experienced Senior Project Manager with Digital and iLottery experience to join our Project Management Office team within our Winnipeg Office at 140 Otter Street.

As a Senior Project Manager, you will lead complex, customer-facing Digital and iLottery initiatives, ensuring projects are delivered on time while meeting key milestones and deadlines and upholding the highest standards of quality and performance.

What We Offer

- Competitive compensation
- Profit sharing program – every role plays a part in our success!
- Company pension
- Health & Extended Benefits
- Opportunities for professional development
- Tuition reimbursement
- Employee & Family Assistance Program
- On-Site Cafeteria & Outdoor Patio
- On-Site Gym
- A variety of committee driven employee engagement activities
- Free Parking
- We are one of Manitoba's Top Employers for 2024

What You'll Do

- End-to-end project management for complex IT Digital and iLottery initiatives, from concept to delivery and successful closure, meeting security, compliance and quality standards.
- Support other programs and projects with dependencies on IT Digital and iLottery by leading assigned workstreams and with effective reporting to other program managers as required
- Successfully deliver multiple projects meeting requirements, deadlines, and quality standards within budget constraints.
- Ensure effective oversight of 3rd party service providers by developing and maintaining strong relationships, establishing clear communication channels, and facilitating regular updates to preemptively address potential issues and delays.
- Provide comprehensive project reporting for internal and external stakeholders.
- Foster effective communication among diverse and global teams to achieve project objectives.
- Skillfully manage priorities, adapt to changes, and meet stakeholder expectations.
- Demonstrate expertise in risk management and proactively plan for risk mitigation.
- Handle issues expertly, identifying and resolving challenges.
- Manage project plans and dependencies across internal stakeholder groups and external customers.
- Continuously improve delivery processes to optimize project outcomes and efficiency.

- Collaborate proactively with fellow Project Managers to exchange ideas and drive improvements across the enterprise.

Who You Are

- Skilled in collaborating with global teams and executing large projects successfully.
- Proficient in project governance processes and frameworks.
- Proactive and client-focused, ensuring high client satisfaction.
- A skilled communicator across various channels, adapting communication styles and tools to suit different audiences (executives, customers, project team members).
- An individual with strong interpersonal skills and who naturally leads by example.
- Known for effective influencing and decision-making.
- An excellent critical thinker who consistently demonstrates excellent analytical skills.
- Highly adaptable to change and actively drives and embraces change.
- Possesses the ability to focus on the bigger picture and the goals that truly matter.
- Proactively drives continuous improvement and shares best practices.

What You'll Bring

- Post-secondary education in Information Technology, Project Management or another related field is required, with Project Management Professional (PMP) designation considered an asset
- 5+ years extensive experience managing large IT Digital projects that encompass various departments, divisions, and business units. iLottery project experience is an asset.
- Proven ability to concurrently manage multiple, complex projects within a portfolio.
- Proficient in creating and maintaining comprehensive project plans, schedules, and Risk, Assumptions, Issues, and Dependencies (RAIDs) for multiple projects simultaneously.
- A comprehensive understanding and practical application of both agile and waterfall project management methodologies.
- Working knowledge of Smartsheet, JIRA and Confluence is an asset.
- Working knowledge of ITIL, IT Security, IT Compliance, business and systems analysis, application development and software quality assurance methods are assets.
- Knowledge of the gaming, retail, and/or distribution industries are assets
